

ZELENSKIY OLEG

frontend developer

ABOUT ME

Front-end developer with experience in creating modern web applications, online stores and dynamic single-page websites. I specialize in React and JavaScript, work with responsive layout, API integration and performance optimization. Focused on creating fast, convenient and visually attractive interfaces. I have experience in developing e-commerce projects, selling expensive goods and services, as well as creating functionality to improve UX: dark theme, dynamic navigation, custom search solutions, etc. I am constantly improving my skills and am interested in new technologies in the field of front-end.

WORK EXPERIENCE

2020-2021 INTERNSHIP AT "VIZOR"

frontend developer

Participated in the creation of an admin panel for bus schedules, implementing interactive graphs for passenger flow analysis and route optimization. Used [technologies used: JavaScript, React, SCSS, three.js].

2021-2022 EDUCATIONAL PROJECTS

full stack developer

During my studies, I developed several full-stack projects covering both frontend and backend development. The main focus was on creating interactive web applications with a convenient administrative panel, real-time data processing, and interaction with databases.

These projects allowed us to gain practical experience working with the full cycle of web application development - from design to final deployment.

2022-NOW CONTENT MANIA

frontend developer

I have extensive experience in creating responsive and interactive web interfaces. I design and develop the front-end of web applications, ensuring high-quality display on different devices and browsers. Also testing and fixing display in different browsers, improving performance and page loading speed
